

## Specifications:

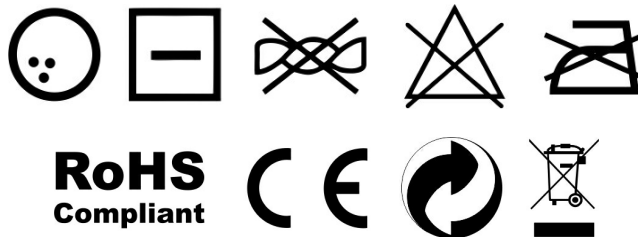

- battery: any power bank with USB output (not included)
- heating element: 2.6 W - carbon fiber
- the heating element is located on top part of the feet
- modes: 100% (HI)
- working time: 10000 mAh power bank - 7 h (HI)
- fabric: 72% wool, 20% spandex, 6% rubber, 2% nylon
- sizes: M, L
- weight without batteries: 150 g

## Features:

- The heating element is constructed from carbon fibres offering extraordinary reliability and durability as well as medical properties, thanks to infrared waves
- A large surface area of the heating element evenly distributes the heat, soothing and heating your body

## Cleaning and maintenance

The heating element used in is resistant to moisture. However, strong laundry detergent can cause mechanical damage of the heating element . Therefore, we recommend surface cleaning with a cloth or brush with a small amount of detergent and gentle rinsing . If you need a more powerful washing, tightly wrap the end of the power cord. Do not clean with battery connected to them !

## Turning on and operation

Each time before turning on , make sure that the built- in connection cable is not mechanically damaged. Also make sure that the connected battery is free of mechanical damage.

Connect the battery to the built-in cable. Place the battery in pocket.

The heating will start automatically when you turn on

To turn off the heating turn off power bank.

2. Turn on your power bank according to power bank's user manual
